

Destination Imagination

Come discover how much fun **Destination Imagination (DI)** can be! Creative problem solving, thinking “outside the box”, and learning to work with others in a team atmosphere: these are just a few of the abilities that your child will develop through the **DI** program.

Destination Imagination encourages students to build on their strengths and to discover skills they never knew they possessed. The students work in teams, under the direction of a team manager, to solve and present a challenge. The challenges have open-ended answers, and allow the students to be imaginative, original, and ingenious! Each challenge is different and encourages the students to work on various skills such as: design and construction, playwriting, scientific design, mathematics and fine arts. View this year's challenges at www.madikids.org

DI has a long history at IACS and we would like to continue to offer the program here. We are currently collecting information from families who are interested in participating. Our goal is to connect students around the same age with adults who are willing to manage or co-manage a team. Training is provided to managers.

If you are interested, please fill out the form at the bottom of the page and return it to the school office by **Wednesday, November 3, 2010** with \$40 participation fee. Fee will cover all expenses through the Regional Tournament on March 6. Requests received after November 3 will be accommodated as we are able. Be part of another great year of DI at IACS!
